Native PDF Annotation and Reversal Acceptance

DOI: 10.9898/rv-native-abd70179dcff

This is a synthetic source for native annotation acceptance.

Select the complete title or DOI from this page to test correction.

No scientific evidence, model output, or publication is represented.

Second Page: Selection and Conflict Checks

A source selection on this page must preserve its page location.

Late comments must not replace a newer selected passage.

The following identifier belongs to another fixture Catalog paper.

DOI: 10.9898/rv-collision-abd70179dcff

Selecting that identifier must report a conflict without changing data.

Third Page: Continuous Reader Acceptance

This final page exercises lazy loading and continuous scrolling.

The visible page and highlighted selection remain source anchored.

Wrong PDF and reopen decisions preserve append-only audit history.
